

**Friday - 21.02.2020**

**09:15 - 10:00**

**Registration open and welcome coffee**

---

**10:00 - 10:15**

**Welcome to the IRU Logistics and Innovation Forum**

IRU will welcome participants and introduce the key themes and partners for the 2020 Forum.

---

**10:15 - 10:50**

**Can new technology deliver safer, and more profitable, logistics?**

Safety is a key element for all transport stakeholders.

**10:50 - 11:10**

**What to expect from intelligent trucks**

With over 85% of all road traffic accidents caused in part by human error, fully automated vehicles should make roads significantly safer.

**11:10 - 11:30**

**Networking and coffee break**

---

**11:30 - 11:50**

### **A new era for urban logistics vehicles**

Dense and congested urban areas have unique safety and operational challenges.

**11:50 - 12:10**

### **Will truck platooning change the game?**

Semi-automated technologies such as truck platooning will appear on our roads and in our fleets before we eventually see fully automated trucks.

**12:10 - 13:00**

### **Networking lunch break**

**13:00 - 13:20**

### **Panel debate: Will vehicle automation really lead to zero accidents?**

This lively panel will debate the introduction of fully autonomous vehicles on public roads and how soon we will see an impact on safety.

**13:20 - 13:40**

### **Averting accidents through better fleet management**

Proper planning, visibility and proactive fleet management can be an excellent way to avoid stress and driver overload.

**13:40 - 14:00**

### **Digitalisation of transport for improved road safety**

In a highly digitalised world, data and information are finding valuable new uses to boost safety and find new business opportunities.

**14:00 - 14:20**

### **Making insurance solutions more agile?**

With big data and mobile technologies, insurance companies have more possibilities than ever before to monitor driver performance.

**14:20 - 15:00**

### **Networking coffee break and speed brainstorming**

**15:00 - 15:20**

### Watching out for safety: Smart cameras

New technology and regulations on improved visibility for buses, coaches and trucks see our vehicles equipped with increasing numbers of cameras.

**15:20 - 15:40**

### Driver monitoring: The way forward?

Driver monitoring has demonstrated its positive impact on drivers' behaviour.

**15:40 - 16:00**

### It's not all about technology: Driver training

While technological solutions are most prevalent in the media, humans are still – and will be for some years to come – the best vehicle “operator”.

**16:00 - 16:30**

### Wrap-up, awards and conclusion

So is investing in safety really a business opportunity?

**16:30 - 19:00**

**Networking cocktail**

---

**Key**

-  Sessions and Panels
-  Business talks 1: Focus on vehicles
-  Business talks 2: Focus on operations
-  Business talks 3: Focus on drivers
